RONDO INSPIRE® REVEAL BEADS

A strong, straight and clean finish to window openings that require internal trimming is simple to achieve with Rondo's range of Reveal Beads.

Quick and easy to install, Rondo's Reveal Beads are cold rolled from Zincanneal steel and are UV-resistant, making them strong and able to withstand harsh UV rays without cracking or breaking down.

RONDO®

www.rondo.com.au

Rondo recommends each application to be bedded in with a suitable gap-filling adhesive to the supporting framework around the window opening, whether it is masonry, timber or steel studding.

A bead of paintable gap-filler can be applied to finish butt corner intersections. Rondo Reveal Beads can be cut by hand with sharp shears, or with other cutting devices, such as a drop saw.

Special Features

0.75BMT Zincaneal® G2S steel

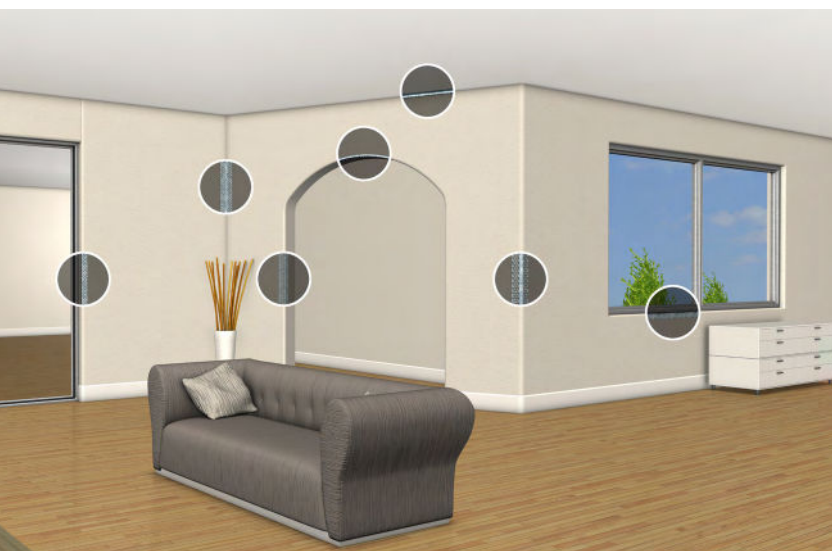

Quick and easy to install

Perforated leg for setting into the surrounding wall lining and can be painted over to match the wall finish

Available in a range of different widths

Rondo Reveal Beads are available in a range of different sizes to suit most commercial and residential projects.
